Cochlear implantation in the developing world – The Indian story

Dr Neelam Vaid M.S.,D.N.B K.E.M. Hospital, Pune, India

The Indian Paradox

A country of over 1.3 billion with a rapidly expanding economy

A growing middle class - economic independence similar to their counterparts in the developed world

Millions - below poverty line

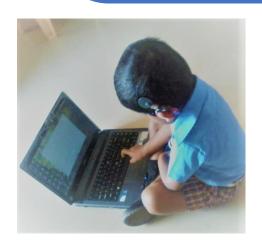

- One third of worlds poorest people live in India
- 363,000,000 are below the poverty line

<1.25 dollar per day per head. CIA world factbook 2011

Rangarajan panel Rs 47/day in urban and Rs 32/day in villages

The Dilemma

Balancing an advanced technology with the requirements of a developing country

Who will take care

Public health services

Private health services – used more frequently

National Family Health Survey 3 Urban 70% Rural 63%

Cochlear Implants

Evolution in funding

1990s – Self funding

Early 20s – Private trusts esp Tata trust, Mahindra, NGOs: SAHI, Corporate houses

2010 onwards – State and Central Govt

Stakeholders

Professionals involved

- Family and the receipient
- Cochlear implant manufacturers

What did we do

Assigned a social worker and coordinator to assess

Network with individuals, corporates, charitable trusts.

Establish credibality – Progress reports

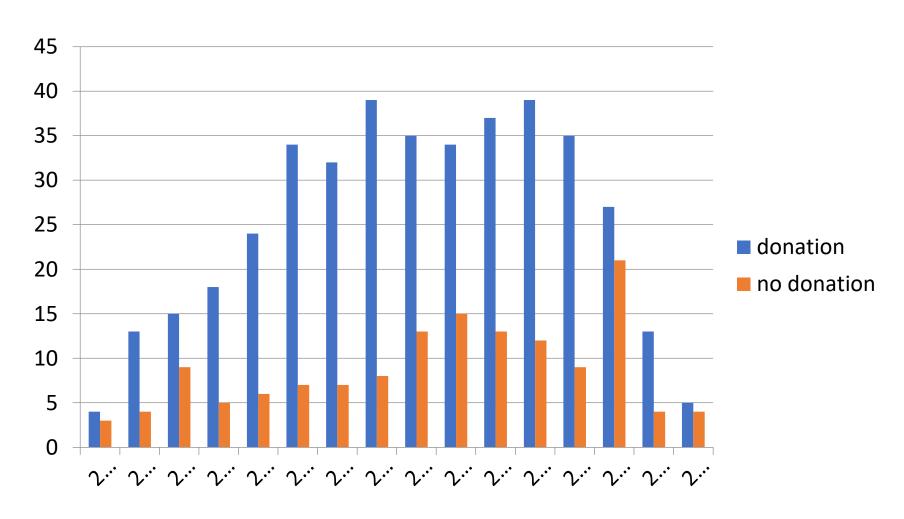

Fundraising

Set up a cochlear implant fund – soft loans.

Involve implantees and their families

Involve the manufacturers

Funding

Where are the funds coming from

28.2%- self

51.3% - private trusts

4.9% - insurance

7.5% - central govt – ADIP/PM fund

6.6% - state govt - CM/PMC/MPJAY/RSBK

Government funding

State – 12 states and 1 union territory

Central – ADIP & CSR

Andhra Pradesh

Assam

Bihar

Chhattisgarh

Delhi UT

Gujarat

Karnataka

Kerala

Madhya Pradesh

Rajasthan

Tamil Nadu

Telangana

Uttar Pradesh

'4,101 children got cochlear implants under CMCHIS'

CHENNAI, SEPTEMBER 25, 2021 00:53 IST **UPDATED:** SEPTEMBER 25, 2021 00:53 IST

Cochlear implants to be free of cost soon in Delhi: Satyendar Jain

The Delhi government is planning to introduce cochlear implants for free of cost to patients under Delhi Arogya Kosh scheme, said Delhi Health Minister Satyendar Jain on Thursday.

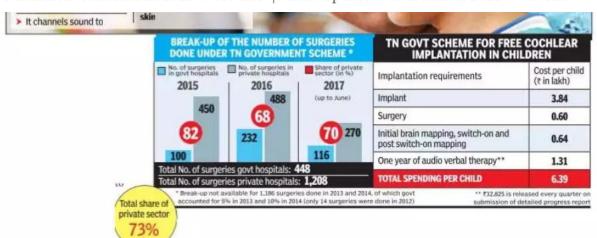

Published: 05th March 2021 07:46 AM | Last Updated: 05th March 2021 07:46 AM

Keep options

- Policies vary, governments change, officials change
- Family is not a stakeholder
 - Choice of implant
 - Commitment
 - Ability to maintain the device
- Interference bureaucracy
- Priorities for spending malnutrition, HIV

Challenges - Sustainability

NON USERS

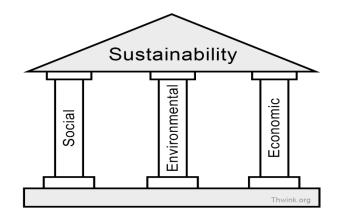

Maintainence – Repair of processors, cost of travelling

Accessories

Upgrades – Mandatory or selective

Implant reliability issues – paediatric programme

Revision surgery

Solutions

Government funded – Property of the government

Health insurance

Dialogues with Government officials

The biggest mistake that you can make is to believe that you are working for somebody else...The driving force must come from within you.

Conclusion

India is a giant which was late in waking up to the reality of cochlear implantation

However a full spectrum of hearing solutions is now available in the Indian subcontinent

Despite several challenges, cochlear implantation in India is a success story
