All public spending is under scrutiny and particularly public health scrutiny in the global pandemic. Spending on hearing care and CI in particular is challenged everywhere but particularly in low and middle income countries and for long term support and for special cases.

This, our third CIICA LIVE event, chaired by Ruth Warick, President of IFHOH, will explore the evidence for the cost-effective arguments for CI, the success of the Spend2Save arguments, and specific examples of challenge and success in funding CI provision globally.
