

CIICA CONVERSATION: THE IMPACT OF TINNITUS ON CI USERS

This CIICA CONVERSATION will allow you to explore with others the impact of tinnitus on everyday life.

- How much you are affected by your tinnitus?
- In what situations does tinnitus disturb you most?
- Do your friends and family understand how tinnitus impacts on you? How do you describe it to them?

Robert Mandara will introduce the session following on from the previous ones, and Kelly Assouly, tinnitus researcher, will share with us the results of her study “The impact of tinnitus on adult CI recipients” exploring the impact of tinnitus on adult CI users, situations impacting tinnitus, tinnitus-related difficulties and tinnitus management strategies.

Please register and join this conversation if you are, for example, a tinnitus sufferer, CI user, a parent of a CI user, or a professional working in the CI and/or tinnitus field.

Places are strictly limited, with no space for spectators! Our CIICA Conversations have small groups and last one hour. Live captioning will be provided in English and other languages by request.
